GOVERNMENT OF INDIA
STATISTICAL DEPARTMENT

Calcutta, May 30, 1904

*Final General Memorandum on the Wheat Crop of the season
1903-04*

This season has been exceptionally favourable for wheat and the good crop of last year has been exceeded by 20 per cent in area and 21 per cent in yield; yet with an addition of more than 4½ million acres, the harvested area is still below the level of the early nineties, that is, before 1895-96, when began the series of bad seasons that so sorely afflicted the central and western regions of India. But in the principal wheat-growing tracts of Northern India, where the crop is most prolific and from which the supplies for export are so largely drawn, the area is the largest on record, the excess over the highest other year being 975,000 acres in the United Provinces and 360,000 acres in the Panjab, where cultivation has extended on the Chenab and Jhelum Canals. In the matter of yield, moreover, this crop stands pre-eminent, and the total of 9,390,000 tons, is 1,600,000 tons more than the large crop of 1902-03. In the United Provinces the season was not quite so good and in Bengal about the same as last year, but in the Panjab and in the North-West Frontier the copious rain in March was highly beneficial and an exceptionally good harvest resulted. These same rains, however, which extended into the Central Provinces and Berar came too late to benefit the earlier crop of those regions which had suffered somewhat from want of moisture, but on the contrary did considerable damage, so that the very favourable anticipations formed, earlier in the season were not fully realised. The crop has been least successful in Bombay, but fortunately the unfavourable conditions were most prevalent where the area under wheat is not important, and Sind has had an extremely good crop. In all the other territories also there has been a favourable harvest. The outturn in Berar appears to have been under-estimated, as 18½ lb to the acre is an extremely low yield for the declared condition of the crop. A very low rate, 199 lb to the acre, has also been returned by Hyderabad.

The exports during the last five years have been :

	Tons
1899-1900	485,204
1900-01	2,501
1901-02	366,091
1902-03	514,607
1903-04	1,295,566

Prices are everywhere lower at present than they have been since 1899. The following figures represent the quantities (in sars) sold for a rupee in the first-half of the months mentioned :

	Panjab	United Provinces	Central Provinces	Bombay
March 1900	11'81	12'31	9'44	7'61
" 1901	11'23	10'5	8'57	8'18
" 1902	15'56	14'31	12'75	9'19
" 1903	15'01	14'75	13'82	10'85
" 1904	16'85	15'67	14'76	13'34
April	17'56	15'67	15'62	13'53

The provincial reports are summarised below :

In the Panjab the conditions at sowing time were distinctly favourable. The winter rains began in the last week of December when fair to good rain was received in all except the south-western and south-eastern districts. Light rain fell in all districts except those of the Delhi division in the first week of January. This was followed by a general fall in the middle of the month. The opportunity was seized for making supplementary late sowings in the north and central Panjab. The next rain came just at the right moment in the first week of March, the fall being general and much above the normal. In Hissar, Rohtak, Gurgaon, and Delhi, where wheat is not a very important crop, the Christmas rains had failed and the unirrigated crops, which were at the last extremity, were saved from total failure. An excellent outturn of grain was assured in all other districts. Useful showers fell in the fourth week of March in the western, south-western, and submontane districts. April was dry and remarkably free from those hailstorms which so frequently damage the ripening corn, and the weather conditions were equally fortunate for harvesting operations. The total area sown was 7,765,700 acres (irrigated 4,112,800 and unirrigated 3,652,900 acres), this being 11 per cent in excess of last year's area and 13 per cent over the decennial figures. As was to be expected in a season of copious rainfall, there was a larger proportion of unirrigated cultivation. The area of the present season is the largest on record, the previous best for the province (as now constituted) being 7,404,200 acres in 1900-01. A

part of the excess may be ascribed to cultivation on the Chenab and Jhelum canals. The total outturn is estimated at 3,076,200 tons as against 2,314,700 tons last year and 2,551,700 tons in 1900-01, so that a record has been established for yield as well as for area sown. The proportionate outturn is estimated at 18 annas (112 per cent), giving a yield 55 per cent above the decennial average. There can be no hesitation in classing this as a bumper harvest, and the straw appears to have been as good as the grain. A serious misfortune which calls for special notice is the particularly virulent outbreak of plague which has visited the new Jhelum colony. In consequence of this a large proportion of the new settlers have fled to their old homes, abandoning a large area of splendid wheat which is likely to be left to rot on the ground. Prices at Ferozepur, with two brief rises to 16 sers in August and March, have been steady at 17 sers per rupee throughout the year. At Amritsar prices ruled fairly steady at 18 sers up to the middle of February. There was then a rise to 17 sers until the middle of April, when the prices again fell to 18 sers.

In the North-West Frontier Province copious and well-distributed monsoon rains lasting up to the middle of September facilitated the preparation of an unusually large area for wheat sowings. But the next three months were practically rainless. Much of the unirrigated land therefore remained unsown, and part of what was sown failed to germinate for want of moisture. Heavy rain, however, fell everywhere from the last week of December to the end of January and altered the situation completely. The cultivators were thus enabled to make extensive sowings on unirrigated lands during January. February was fair and favourable for growth. Heavy and opportune rain was received in all districts throughout March and an unusually large proportion of an unusually large area was brought to maturity. The area sown comes to 994,000 acres as against 822,900 acres last year and 796,500 acres in 1901-02. There are no figures for years previous to 1901-02, but this year's area is believed to exceed all records. The total outturn is estimated to be 302,100 tons (68½ lb per acre) against 234,600 tons (65½ lb per acre) in 1902-03 and 159,300 tons in 1901-02. Seeing that 70 per cent of the crop is unirrigated, this outturn is decidedly good, and the yield all round is said to be the best within living memory. Prices have already fallen to a very low level, and a further fall is expected.

In the United Provinces of Agra and Oudh the land which had been prepared for sowing the wheat crop was either scoured or beaten down by the heavy and continuous rain, which marked the close of the monsoon, so that much of the value of the early tillage was lost: there was not time to do the lost tillage over again and the crop was sown rather late, with inferior tillage and excessive moisture in the ground. From sowing-time onwards, however, the season has, on the whole, been remarkably favourable, the deficiency of the winter rains being largely made up by artificial irrigation. The cloudy weather at the end of February and the beginning of March induced a rapid spread of rust, but it came too late to do serious harm. Hailstorms and strong winds are reported to have caused some damage in places, but their number was not great. In the eastern divisions of Gorakhpur and Benares, where the crop was unhealthy from the beginning owing to excessive moisture, the yield is estimated respectively at 75 and 80 per cent of the normal. Elsewhere it has been better—90 per cent in Agra, Rohilkhand, Lucknow, and Fyzabad, and 95 in Meerut and Allahabad divisions. For the provinces, as a whole, the yield of wheat is estimated at 90 per cent compared with 93 last year. The quality of the grain is also good except in a few localities where the crop suffered from drought or strong winds. The total area under wheat had risen last year from 6,451,700 to 6,909,500 acres, or by nearly 7 per cent. This year a further increase of 14 per cent has taken place; the total area being 7,885,000 acres, of which 6,234,900 acres were sown alone and 1,650,100 acres mixed with gram and barley, compared with 5,420,700 and 1,488,800 acres in 1902-03. The outturn of wheat sown alone is this year estimated at 2,615,200 tons compared with 2,385,200 tons in 1902-03 and of wheat sown in combination with barley and gram at 614,800 tons: total 3,230,000 tons which is nearly 9 per cent more than the yield of the preceding record year. Wheat sown with other crops and not harvested separately is largely consumed locally and does not add to the stock of wheat from which exports are drawn. Prices are lower than last year both in local markets and at the ports.

In Bengal the heavy rains in October favoured the retention of moisture by the soil during the wheat-growing season. In November light showers were obtained all over the province, except in Bihar, where the bulk of the wheat crop is raised. December was practically rainless, but the crop in Bihar was much benefited by the January rains. In February the rainfall was more general and copious. The normal area under wheat is at present estimated at 1,498,500 acres, while the area planted this year is returned at 1,508,600 acres, against 1,417,000 acres sown last year. Considering the favourable condition of the season, the crop may safely be estimated at 90 per cent of the normal, and the gross outturn at 527,800 tons compared with 485,900 tons of the past year.

In the Central Provinces it was reported in February last that the crop had been somewhat affected by the absence of winter rains. The heavy rain which fell at the end of February and the beginning of March and which was in some localities accompanied by severe hailstorms has caused further deterioration, and it is estimated that the outturn for the province as a whole is slightly below the normal. In the second forecast the area under wheat in the Central Provinces was estimated at 2,738,000 acres. The actual area amounts to 2,912,000 acres, which is 27 per cent above that of last year and 7 per cent in advance

of the decennial average. It is larger than the area sown in any year since 1894-95. The area placed under wheat in Berar is 452,700 acres which is larger than the estimate given in the second forecast. It is 109 per cent larger than last year's area but still 15 per cent short of the decennial average. The recovery is most marked in the principal wheat-growing districts of the Central Provinces as well as in Berar. In Berar and the Nagpur country the increase is largely due to the failure of jawar caused by excessive rains. In the rest of the Central Provinces the good crop of last year and general recovery from the effects of the famines are the principal causes of the increase. The heavy rains and cloudy weather of February and March appreciably damaged the crop, whilst hail also caused some injury. The district estimates are generally smaller than those estimated in February last. For the Central Provinces, as a whole, the outturn may be taken at 96 per cent of the normal. Expressed in tons, the yield of this season's crop is 750,000 tons as against 666,600 tons last year, and is 69 and 62 per cent respectively above the averages of the previous five and ten years. The damage caused by heavy rain and hail in Berar is reported to be greater than in the Central Provinces; the district outturns give 77 per cent of a normal crop; and the total estimated yield is 36,600 tons, which is 109 per cent larger than last year, and 205 per cent over the quinquennial average, though still 14 per cent below the decennial average. Prices have fallen slightly as compared with the previous year.

In Bombay (including Sind) the general result is an outturn of 708,000 tons from 2,477,000 acres, or an increase of 24 per cent compared with last year's crop in area of 348,000 acres or 16 per cent and in outturn of 100,000 tons or 16 per cent. The area in British districts stands at 1,820,000 acres, which is 17 per cent in excess of last year's area, but still about 6 per cent short of the decennial average. In Ahmadabad, Dharwar, and Poona there was an appreciable diminution below last year's area owing to the extended cultivation of cotton, and of jawar and other food crops. But in most districts the area under wheat increased owing to favourable rains at sowing time in the Presidency proper and to a plentiful water-supply in Sind. In the Native States the total area is returned at 657,000 acres, which is 14 per cent over last year's area and 22 per cent in excess of the average. Of the total area sown in the Presidency proper 13 per cent was helped by irrigation. Of this again 52 per cent was in Gujarat, 44 per cent in the Deccan, and only 4 per cent in the Karnatak. The season was good in Sind and Gujarat. In the Deccan the crop suffered from deficiency of moisture, particularly in parts of Nasik, Ahmadnagar, Poona, and Sholapur, and from locusts and rats in places. In the Karnatak late rains were excessive: much damage was done by rust, and the outturn was reduced to from 1 to 8 annas. Of the total outturn (708,000 tons) 44 per cent was produced in Gujarat, 19 per cent in the Deccan, 9 per cent in the Karnatak, and 27 per cent in Sind. For the province generally the season was fairly good. Prices of food grains have ruled every where much lower than last year, and have reached and in some places fallen below the level of prices previous to the famine.

In the Nizam's Territory the area is now returned at 1,134,800 acres (*khalsa* 863,700 acres and *jagir* 271,100 acres) as against 652,000 acres (*khalsa* 508,800 acres and *jagir* 143,200 acres) in the year previous, an increase of 482,800 acres or 74 per cent. Compared with the averages of the past five and ten years the acreage of 1903-04 shows an increase of 53 and 16 per cent respectively. This comparison, however, exaggerates the increase, as the estimates of past years did not include *jagir* areas. The estimate of outturn stands at 100,500 tons, which is an increase of 87 per cent on the year previous.

In Rajputana both the area and the yield show a very marked increase over the preceding year and the quinquennial average. In Central India both area and yield have increased substantially over the figures of the preceding year and the average.

In Mysore also both the area and the yield have been substantially larger than those of the preceding year and the quinquennial and decennial averages.

J. A. ROBERTSON,
Offg. Director-General of Statistics.

J. WILSON,
Secretary to the Government of India.

Estimate of the Wheat crop of the season 1903-04.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 2nd June 1904, based on the India Daily Weather Reports of the period.

The cyclonic storm which struck the Madras Coast near Cocanada on the 26th passed along a curved track which led it through the south and east of the Central Provinces and Chota Nagpur into Central Bengal, where it filled up during the 28th. It occasioned general moderately heavy rain over the regions traversed by it, the principal falls recorded having been as follows:—on the 27th 3'16" at Raipur, 2'92" at Calcutta, 2'59" at Waltair, 2'31" at Cuttack and 2'13" at Gaya; on the 28th 5'36" at Cherra Poonjee, 3'80" at Dinajpur, 2'39" at Bogra and 2'09" at Jessore; and on the 29th 11'36" at Cherra Poonjee, 5'83" at Tezpur, 5'78" at Dhubri, 2'65" at Shillong and 2'62" at Chittagong. During these three days the weather was generally fair over other parts of the country, though a few scattered thundershowers were experienced.

On the 30th and 31st of May and the 1st of June the weather was generally quiet and fine, though general showers were received over the south of the Peninsula and north-east India and scattered showers over Burma, the north-west Himalayas, the Central India Plateau and the Deccan. The principal amounts recorded during these three days were:—2'45" at Moulemein and Salem, 2'05" at Coimbatore, 1'77" at Diamond Island, 1'62" at Trichinopoly and 1'51" at Bangalore on the 30th; 1'68" at Bangalore, 1'65" at Udaipur, 1'29" at Narayanganj, 1'27" at Mymensingh and 1'15" at Mandalay on the 31st May; and 2'42" at Diamond Island, 1'89" at Mandalay, 1'64" at Tavoy, 1'46" at Mangalore and 1'20" at Mergui. On the last day of the week conditions appeared to be less settled. A slight depression had appeared over the Andaman Sea, Mergui had received 3'10" of rain and rain had been general all over Burma, while the sky had become overcast, the barometer was falling and the sea rising on the Malabar Coast, where Calicut reported a fall of 3'50" of rain.

The rainfall table shows that practically no rain was received during the week over the Ludhiana subdivision, the Cawnpore subdivision, the North-West Dry Area, Baluchistan, the Jhansi subdivision, the Gujarat division, the west Satpuras and the Bellary and Bijapur subdivisions. In all other places effective rain was received, the average actual fall ranging from 0'12" in the Jubbulpore subdivision to 7'28" in the Brahmaputra Valley. The week's rainfall was generally heavier than usual, except over Burma and the west and interior of the Peninsula, where the weather has been much finer than usual. In the Bombay subdivision the actual average rainfall only equalled 0'21", while the normal average is 2'27".

The seasonal rainfall up to date is short of the average over Burma, Orissa, the east of the Central Provinces, the west of Central India and the Bombay Presidency, but is generally normal or above the normal elsewhere.

W. L. DALLAS,

for Meteorological Reporter to the Government of India
and Director General of Indian Observatories.

J. WILSON,

Secretary to the Government of India.

SIMLA:
The 4th June, 1904.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
28th May 1904.

Madras.—The rainfall of the week was light in parts of the Deccan and Tinnevely; and fair to good elsewhere. Irrigation supplies are insufficient in South Arcot, Salem, South Canara, parts of the Circars, the Deccan and the Southern districts. Ploughing, sowing and transplanting are in progress in parts. The standing crops are generally fair. Harvests continue in parts with fair to normal outturn. Pasture is scanty in parts of the Circars, the Deccan, Madura and South Canara; fodder is procurable. The condition of cattle is generally good. Prices are almost stationary.

Bombay.—Moderate rain fell during the week in parts of Belgaum, Dharwar and Kanara; slight rain in parts of Khandesh and Satara; and very slight in parts of Thar and Parkar, Ahmedabad, Ratnagiri, Nasik, Ahmednagar, Poona, Sholapur and Bijapur. The standing crops have been slightly damaged by locusts in parts of the Deccan and Belgaum. Threshing of spring crops has been completed in the Upper Sindh Frontier; is nearly over in Hyderabad and continues in parts of Sukkur, Thar and Parkar and Nasik. Picking of cotton is nearly completed in Dharwar and continues in parts of Ahmedabad and Kaira. Preparation of lands for autumn cultivation is generally in progress. Sowing of autumn crops has been commenced in parts of Larkana, the Upper Sindh Frontier, Thar and Parkar and Satara; and continues in parts of Ratnagiri, Belgaum, Dharwar and Kanara. Fodder-supply is sufficient. Agricultural stock and water-supply are generally sufficient. Prices have fallen in one district; risen in two districts; and are stationary elsewhere.

Bengal.—Rain fell during the week throughout the Province. The fall was heavy in some parts of north and east Bengal, where the excessive rain has retarded the weeding of rice and jute. Ploughing and sowing continue. Prospects are generally good. Fodder and water are generally sufficient. The price of common rice has risen in five districts; fallen in five, and is stationary in the remainder.

United Provinces.—Rain fell in forty-one districts, accompanied by slight hail in Dehra Dun, Aligarh and Cawnpore. No appreciable damage was done. Irrigation of sugarcane, indigo and rice continues. The preparation of fields for autumn crops is in progress. Supplies and fodder are sufficient. Prices are almost stationary.

Punjab.—Slight rain has fallen in parts of Delhi, Umballa, Lahore and Rawalpindi. Insignificant showers have also been reported from Hissar, Jullundur, Sialkot, Shahpur and Mianwali. The price of wheat is rising in Hissar and Delhi; and falling in Jullundur, Lahore, Amritsar and Rawalpindi. The prices of other food-grains are fluctuating. Harvesting of spring crops is in progress in Shahpur, Mianwali and Rawalpindi. Threshing and winnowing of wheat continue in several districts. Sowing of autumn crops is going on in a few districts. The condition and prospects of extra spring and autumn crops are generally good. The outturn of spring crops is reported good in most districts. Spring crops have

been damaged from want of labour (due to plague) in part of Shahpur. Extra spring crops have been slightly damaged by hailstones, and cotton by an insect called "Toka" in parts of Sialkot. Cattle are generally in good condition throughout the Province. Fodder is said to be sufficient in all districts except in parts of Delhi.

North-West Frontier Province.—Showers fell in Hazara and Kohat only during the week. The weather has been favourable for harvest work which is being pushed on and autumn sowings have been begun. The outturn of the spring crop is much above average. Rivers are rising and canal irrigation is satisfactory. The condition of cattle is good. Fodder is cheap and plentiful and prices are low.

Burma.—Good rain has fallen almost everywhere. Agricultural operations have been started in parts of Pegu and Amherst. Reaping of late dry weather paddy has been completed in Meiktila. Ploughing for and sowing of early wet weather paddy have been begun in parts of Shwebo and Kyauksi respectively. Ploughing on uplands in Thayetmyo and sowing on hill sides in Myitkyina has commenced. Plucking of tobacco and gathering of onions in Pakokku and reaping of miscellaneous crop in Minbu have been completed. Sowing of sesamum is finished in the Myitkha township of Kyauksi. Dry weather paddy in the Kyaukpadaung township of Myingyan is fading for want of rain; otherwise the standing crops are mostly doing well. The price of paddy has risen considerably in Thayetmyo and Bhamo and slightly at three centres; it has fallen slightly at one centre; elsewhere it is unchanged.

Central Provinces.—The weather has been hot and cloudy with high winds. Rain has fallen in most districts. Raipur received $3\frac{1}{2}$ inches, Bilaspur $3\frac{1}{2}$ inches and Sambalpur over an inch. Elsewhere the rainfall was insignificant. Preparation of land for autumn sowings continues. Fodder is getting dearer in the Wardha and Nagpur districts. Scarcity of water is also being felt in parts of these two districts and Mandla. Prices have fallen in Damoh, Mandla and Seoni; elsewhere they have fluctuated slightly.

Assam.—Rain fell throughout the Province and was especially heavy in Goalpara and Darrang, retarding cultivation of rice and growth of jute. Ploughing for and sowing of early and late rice, plucking of tea and sowing of cotton are in progress. Planting of sugarcane has been finished in all districts, except Darrang and Sibsagar. Prospects of tea, sugarcane and early rice are fair, but the weather is too wet for tea in Darrang. Prices—common rice—Silchar, 17; Sylhet, Dhubri and Sibsagar, 16; Tezpur, 15 and Gauhati, Nowgong and Dibrugarh 13 seers per rupee.

Mysore.—Rain—one inch 39 cents in the Civil and Military station. The rainfall was also generally good throughout State. Prices have fallen in Shimoga and Chitaldroog. The standing crops are in good condition. Prospects of the season are good. Cattle are healthy except in parts of Shimoga. Water and fodder are available.

Coorg.—Rainfall—11 cents. Ploughing for rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Hyderabad.—Rainfall—18 cents. The late rice harvest continues in parts. Lands for autumn sowings are under preparation. Prices—wheat 14, rice $11\frac{1}{2}$ and *juar* 29½ seers per *hali* rupee.

Rajputana.—Rain fell in parts during the week. Agricultural operations are satisfactory. Threshing is in progress and land is being prepared for autumn cultivation. Prospects

of spring crops and condition of cattle are generally good. Fodder is sufficient. Prices are favourable.

Central India.—There were slight showers during the week in Gwalior, Baghelkhand and Bhopawar. Agricultural operations are in progress in Indore, Bhopal, Baghelkhand, Malwa and Bhopawar. Standing crops are good in Baghelkhand. Agricultural stock and pasturage are generally good. Pasturage is indifferent in Bhopal and part of Gwalior. Prices are low in places, normal in Gwalior, Indore and Bhopal, below normal in Baghelkhand and Malwa, and stationary in Bundelkhand and Bhopawar.

Kashmir.—The weather is generally bright and warmer. Prices are stationary. Sowing of the *shali* (rice) crop is in progress.

Jammu.—Slight rain fell during the week. Prices are fluctuating. Wheat sells from 18 to 28 and maize from 24 to 40 seers per rupee. Condition of standing crops is fair. Fodder is sufficient. Autumn sowings are in progress in some parts. Hail and rain have done damage to grain on the threshing floor.

Nepal.—Rainfall 2·22 inches. The weather is cloudy and cool. Land is being prepared for lowland rice. Price of rice is 6 seers for the rupee.

SUPPLEMENT TO
The Gazette of India.

No. 24.} CALCUTTA, SATURDAY, JUNE 11, 1904.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

J. A. ROBERTSON

Offg. Director General of Statistics

E. N. BAKER

AMENDMENT OF THE RESOLUTION DATED THE 28TH MARCH 1895, RELATING TO THE EXECUTION OF DEEDS, CONTRACTS AND OTHER INSTRUMENTS ON BEHALF OF THE SECRETARY OF STATE.

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

JUDICIAL.

Nos. 955—57.

Simla, the 4th June, 1904.

RESOLUTION.

In exercise of the powers conferred by section 2 of the East India Contracts Act, 1870 (33 and 34 Vict., C. 59), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to direct that, for heads II and III of Part N of the Resolution of the Government of India in the Home Department no. ^{Judicial} 405—501, dated the 28th March 1895, relating to the execution of deeds, contracts and other instruments on behalf of His Majesty's Secretary of State for India in Council, the following heads be substituted, namely:

II.—Contracts and other instruments connected with ferries, dues for grazing cattle on places other than canal banks, fisheries, *nazul* buildings, spontaneous products and minerals, execution of minor works not under the Public Works Department, and the supply of necessaries for depôts.

} By Deputy Commissioners.

III.—Contracts and other instruments in matters connected with the lease or sale of land.

} By Deputy Commissioners.

ORDER.—Ordered that the above Resolution be communicated to the Government of the Punjab for information with reference to its letter* no. 421, dated the 28th March 1904, and to the Department of Revenue and Agriculture for information; and that it be published in the Supplement to the *Gazette of India*.

* Addressed to the Department of Revenue and Agriculture.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

H. H. RISLEY,
Secretary to the Government of India

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 9th June 1904, based on the India Daily Weather Reports of the period.

During the week under review there has been steady daily rain over Burma and the monsoon was apparently fully established over that province about the 5th, when the observer at Diamond Island reported the setting in of that current. The rainfall has been general throughout the province and has been heavy along the coast. The heaviest falls in twenty-four hours during the week were as follows:—1·82" at Tavoy and 1·70" at Diamond Island on the 3rd; 2·60" at Moulmein and 2·03" at Diamond Island on the 4th; 6·56" at Akyab and 2·40" at Moulmein on the 5th; 4·12" at Akyab and 4·08" at Diamond Island on the 6th; 3·80" at Akyab and 3·02" at Tavoy on the 7th; 2·00" at Lashio and 1·55" at Bassein on the 8th; and 2·70" at Bassein and 2·62" at Tavoy on the 9th.

While daily rain was falling over Burma the weather during the greater part of the week was exceptionally dry and hot over Assam and north-east India. Slight barometric depressions existed over the north of the Bay and, throughout the greater part of the week, these depressions diverted the Bay current to the eastern Peninsula at the expense of north-east India. In consequence, from the 3rd to the 8th, the rainfall was exceptionally light over the latter area. Thus at Cherra Poonjee the total rainfall for these six days was only 2½", while the normal is 17½". On the 9th, however, a change commenced. The slight depression over the head of the Bay intensified, the moist current was drawn towards Bengal, Saugor Island reported a fall of 2·41" and rain became much more general over the north-east of India.

The Gangetic Plain, the North-west Dry Area and the Central India Plateau have experienced the usual dry weather with occasional dust and thunder storms.

Over the south-west of the Peninsula the rainfall on the 3rd and 4th was moderate and scattered accompanying thunderstorms, but on the 5th the monsoon current apparently set in on the Malabar coast, and after that date the rainfall became heavier and more extensive along the coast and spread inland over the Peninsula. The principal falls in twenty-four hours in this area were:—2·43" at Mangalore and 2·98" at Chitaldroog on the 5th; 1·97" at Calicut and 1·61" at Goa on the 6th; 2·91" at Calicut and 2·64" at Karwar on the 7th; 5·75" at Karwar and 3·88" at Mormugao on the 8th; and 4·14" at Ratnagiri and 3·73" at Goa on the 9th.

Over the Satpuras and the east of the Peninsula the weather has been showery throughout the week, the showers in the eastern districts increasing considerably, both in amount and extent, on the 9th, under the influence of the deepening depression at the head of the Bay.

The rainfall table shows that there has been no rainfall of importance during the week over the Ludhiana subdivision, the west Gangetic Plain, the Jhansi and Indore subdivisions, and Gujarat, while elsewhere the average actual rainfall has ranged from 0·13" in the east coast (south) division, 0·14" in the Darbhanga subdivision and 0·15" in the North-west Dry Area to 7·27" in the Calicut subdivision, 7·89" in the Bombay subdivision and to 10·24" in the Burma Coast division. The week's rainfall was excessive over the whole of Burma, the west coast, south India, the greater part of the Deccan and the Ranchi subdivision. Elsewhere the rainfall was generally normal or in defect, the deficiency being large and important in Bengal and Assam. In the latter province the average actual fall was only 0·95", while the normal is 5·71", and in the former the average actual fall was 1·29", while the normal is 2·76".

The seasonal rainfall to date is below the normal over upper India and north Bombay and generally normal or in excess elsewhere.

W. L. DALLAS,

for Meteorological Reporter to the Government of India
and Director General of Indian Observations

J. WILSON,

Secretary to the Government of India

SIMLA:

The 9th June, 1904.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
4th June 1904.

Madras.—There was no rain in parts of the Deccan, but the fall was good on the West Coast, the hills and in parts of the Central districts; and light to fair elsewhere. Irrigation supplies are insufficient in Godavari, Bellary, Salem, South Canara and in parts of the Southern districts. Ploughing, mowing and transplanting are in progress in parts. The standing crops are in good condition. Harvests continue in parts with fair to normal outturn. Pasture is scanty in parts of the Circars and the Deccan; fodder is procurable. The condition of cattle is good. Prices are almost stationary.

Bombay.—There was good rain during the week in parts of Kanara; moderate in parts of Bijapur and Dharwar; slight in parts of Ahmedabad, the Panch Mahals, Ahmednagar, Poona, and Belgaum; and very slight in parts of Kaira, Surat, Thana, Kolaba, Ratnagiri, Khandesh, Sholapur and Satara. The standing crops have been slightly damaged by locusts in parts of the Deccan and the Carnatic. Threshing of spring crops is almost completed in Hyderabad and continues in parts of Sukkur and Thar and Parkar. Picking of cotton has been completed in Dharwar and continues in parts of Ahmedabad. Preparation of lands for autumn cultivation is generally in progress. Sowing of autumn crops has commenced in Thana and Poona and continues in parts of Larkana, the Upper Sindh Frontier, Thar and Parkar, Ratnagiri, Satara, Belgaum, Dharwar and Kanara. The fodder-supply is sufficient. Agricultural stock and water-supply are generally sufficient. Prices have fallen in one district; risen in four districts; and are stationary elsewhere.

Bengal.—Rain is reported from all districts except Howrah and Chumparan. The fall was heavy in some parts of North and East Bengal, elsewhere it was light. Jute is reported to have suffered from excessive rain in Mymensingh. More rain is needed in Bankura and the 24-Parganahs; prospects are otherwise good. Ploughing and sowing continue. The fodder and water-supply are generally sufficient. The price of common rice has risen in twelve districts; has fallen in four; and is stationary in the remainder.

United Provinces.—Slight rain fell in thirty-six districts during the week. Irrigation of sugarcane, indigo, and extra crops continues. Harvesting of extra crops and sowing of cotton and rice have commenced in places. Preparation of fields for autumn crops is in progress. A slight scarcity of grass exists in Cawnpore. Supplies are sufficient and prices are almost stationary.

Punjab.—Rain has fallen in Hissar, Ferozepore and Lahore. Slight showers have also been reported from Umballa, Jullundur, Amritsar and parts of Shahpur and Rawalpindi. The price of wheat is rising in Hissar and Rawalpindi, and falling in Umballa, Jullundur, Sialkot and Mianwali. The prices of other food-grains are fluctuating. Spring crops are still being harvested in Shahpur and Mianwali. Threshing and winnowing of wheat are in progress in most districts. Extra spring crops are being reaped in Hissar. Sowings of autumn crops continue in some districts. The condition and prospects of extra spring and autumn crops are generally good. The outturn of spring crops is reported to be good in several districts. In Shahpur the outturn is said to be average, except in the plague stricken villages in the Bhara tahsil where it is below the average. The wheat crop has been slightly damaged

by rain in parts of Lahore. Extra spring crops, cotton and sugarcane have been slightly damaged by an insect called "Toka" in parts of Sialkot. Cattle are generally in good condition throughout the Province. Fodder is said to be sufficient in all districts except in parts of Delhi.

North-West Frontier Province.—There was no rain during the week. The harvesting is approaching completion and the sowings of autumn crops have been commenced. Rain is now needed all over the Province. The water-supply in canals is adequate and owing to the great heat the rivers are rising rapidly. Cattle are in good condition. Fodder is abundant and easily procurable. Prices of food-grains are low.

Burma.—The rainfall of the week was general. Agricultural operations have been started in seven districts of Lower Burma. Reaping of late dry weather paddy has been completed in Bhamo and Sagaing and is nearly completed in Mandalay. Ploughing for and sowing of sesamum have commenced in Minbu, Magwe, Myingyan and Pakokku, and is progressing in the Lower Chindwin. Sowing of maize has begun in Minbu and Magwe and that of cotton is progressing in the Lower Chindwin and Myingyan. Sowing of early wet weather paddy has been completed in Mandalay and is commencing in the Lower Chindwin. Transplanting of the same crop is nearly completed in two townships of Kyaukse. Sowing on uplands is progressing in Thayetmyo and has begun on hill sides in the Southern Shan States. The standing crops are on the whole doing well. The price of paddy has risen slightly at five centres and fallen slightly at three; elsewhere it is stationary.

Central Provinces.—The weather has been hot and cloudy with high winds. Rain has fallen in all districts, except Damoh, Balaghat, Bilaspur and Basim. Betul received $1\frac{1}{4}$ inches and Jubbulpore, Seoni, Narsinghpur, Wardha and Sambalpur from $\frac{1}{2}$ to one inch. Elsewhere the fall has been insignificant. Preparation of land for autumn sowings continues. Sowings of early rice have commenced in places in the Brahmapuri tahsil of the Chanda district. Fodder is generally sufficient but a scarcity of water is being felt in parts of Wardha and Nagpur. In Nimar there has been a sharp rise in the price of *juar*; elsewhere prices show only slight fluctuations.

Assam.—The weather is hot. Rain fell during the week in all districts except Sibsagar and Manipur. Rain is wanted in Upper Assam and Manipur. Ploughing for and sowing of early and late rice; plucking of tea; and sowing of cotton are in progress. Planting of sugarcane still continues in Darrang and Sibsagar. Prospects of tea, sugarcane, cotton, early rice and jute are generally fair, but jute and early rice have been damaged in Goalpara by the recent heavy rain. Prices—common rice—Silchar, 17; Sylhet and Dhubri, 16; Sibsagar, 15; Gauhati and Tezpur, 14; and Dibrugarh 13 seers per rupee.

Mysore.—Rainfall—three inches 50 cents in the Civil and Military station. Good rain also fell throughout the State during the week. Prices are steady. The standing crops are in good condition. The prospects of the season are good. Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall—three inches 60 cents. Ploughing for rice continues. The prices of food-grains are normal. The water and fodder-supply is sufficient.

Hyderabad.—Rainfall—8 cents. The harvest of the late rice is almost over. Land is under preparation for autumn and early rice sowings. Prices—wheat 13 $\frac{3}{4}$, rice 11 $\frac{1}{4}$ and *juar* 29 seers per *halli* rupee.

Rajputana.—There was rain in parts during the week. Agricultural operations are satisfactory. Land is being prepared for autumn cultivation. The estimated outturn of the

spring crops and the condition of cattle are generally good. The fodder-supply is sufficient. Prices are favourable.

Central India.—There were slight showers in Gwalior, Bhopal and Bhopawar, and general rain in Malwa during the week. Agricultural operations are in progress in Indore, Bhopal, Bundelkhand, Malwa and Bhopawar, and have been completed in Baghelkhand. Agricultural stock and pasturage are generally good. Pasturage is indifferent in Bhopal and in parts of Gwalior. Prices are low in places; normal in Gwalior, Indore and Bhopal; below normal in Baghelkhand and Malwa; and stationary in Bundelkhand and Bhopawar. The appearance of locusts is reported from Alirajpur in Bhopawar.

Kashmir.—The weather is bright and warm. Prices are stationary.

Jammu.—There was slight rain during the week. Prices are fluctuating. Wheat sells from 14 to 26 and maize from 20 to 40 seers per rupee. The condition of the standing crops is fair. The fodder-supply is sufficient. Autumn sowings are in progress.

Nepal.—No report received.

J. WILSON,

Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.

SUPPLEMENT TO
The Gazette of India.

No. 25.} CALCUTTA, SATURDAY, JUNE 18, 1904.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

(a) For week ending 4th June 1904.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 16th June 1904, based on the India Daily Weather Reports of the period.

There has been little change during the week under review in the weather conditions over Burma, where monsoon winds have blown steadily throughout the week and daily rain has fallen more or less generally over the province. The rainfall, however, became lighter as the week drew to a close as is shown by the record of the heaviest daily falls which were as follows:—On the 10th 2·03" at Tavoy; on the 11th 1·94" at Moulmein; on the 12th 3·08" at Tavoy; on the 13th 11·35" at Tavoy; on the 14th 3·80" at Mergui; on the 15th 3·20" at Tavoy and on the 16th 1·35" at Mergui.

In north-east India the weather was less settled than over Burma. From the 10th to the 12th conditions over Bengal and Assam were governed by a depression which passed along a curved track from the head of the Bay into east Bengal and during its existence determined general and moderately heavy rain to the north-east, the principal amounts having been 4·15" at Cherra Poonjee on the 10th; 4·12" at Cherra Poonjee on the 11th and 19·78" at Cherra Poonjee and 5·70" at Mymensingh on the 12th. On the 13th the depression had disappeared and rain had to a great extent ceased over Bengal, though it continued moderately heavily over Assam. On the 14th rain again extended over Bengal, but on the 15th it almost ceased and on the 16th, though showers were fairly general, the amounts were small. On this day (16th) a fresh depression was developing over the Bay and rain promised to increase both in amount and extent over north-east India.

Over the west of the Peninsula daily moderate to heavy rain has been received during the week, the largest amounts reported having been 4·26" at Karwar on the 10th; 4·00" at Goa on the 11th; 2·10" at Goa on the 12th; 5·25" at Calicut on the 13th; 1·74" at Calicut on the 14th; 1·50" at Karwar on the 15th; and 1·70" at Karwar on the 16th. This shows that the rainfall at the close of the week was falling off in amount along the West Coast, while the winds, which were variable in direction and generally light in force, indicated that the monsoon current was far from steady in this region.

The monsoon current has not up to date penetrated inland and only sporadic showers have been received over south India, the Deccan and the west Satpuras. Over the east Satpuras and the north division of the East Coast the weather has been affected by the unsettled conditions over the Bay area and frequent, though not very heavy, showers have fallen over those localities.

Over Upper India and the Central India Plateau what rain has fallen during the week has been due to scattered thundershowers, which have generally been unimportant, though Nowgong received 2·51" of rain on the 12th and Indore and Udaipur over 1·00" of rain on the 11th.

The rainfall table shows that actually or practically no rain was received during the week under review over the Ludhiana, Lahore and Jaipur subdivisions or the North-West Dry, Baluchistan and East Coast (South) divisions, while elsewhere the actual average rainfall varied from 0·12" in the Madura subdivision to 9·87" in the Brahmaputra Valley. The week's rainfall was generally more or less excessive over Burma, Assam and Bengal, including the Dinajpur and Burdwan subdivisions. It was also excessive in Orissa and the North Circars, on the Bombay coast and in the Bijapur subdivision, but was deficient in all other places—more particularly in Bihar and north-west India.

The total rainfall from the 29th of April to date has been generally in defect over north-west India, Gujarat and the west Satpuras; in excess over the east of the Peninsula and west, and south-west Bengal and normal in other parts of the country.
